

Hi, My name is

Alex Castillo.

I Build Projects for Pleasure.

I am a student specializing in building notable web experiences. Currently I am focused on creating frontend user interfaces with professional directed workflows.

I. About Me

Image

I am a self-taught software enthusiast creating frontend, data driven products. My enjoyment for web development started when I took an online python EDx course to get ahead in school, I was hooked after that.

From that first moment of development I have learned many software languages and frameworks. My main focus is to learn professional workflows and build user interactive and data driven projects.

My goal is to secure a career as a front end software developer, and further learn a backend development to satisfy my desire to learn.

These are a few technologies I have been working with recently.

→ JavaScript (ES6+) → Figma
→ TypeScript → StoryBook
→ React → Node.js

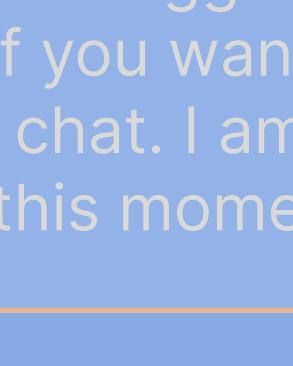

II. Projects

[Featured Project](#)

Cutiee Fruitee NFT

A product to spread cultural awareness through technology built with React, Solidity, and Etheruem.

React Solidity Etheruem Hardhat
